

Holocene.
Intimate illuminations from Wästberg.

No. 1: Ilse Crawford
Instructions.

Care and maintenance

This product is made of solid brass. Brass will naturally darken over time and fingerprints, grease, water etcetera may leave stains on the surface. If you wish to keep the high polished surface, you will need to polish the brass regularly with a brass polish. Brass should never be placed in a dishwasher.

Use a 2 mm cotton wick for best result. Recommended functional height of the wick is 3 mm. Use only with high quality lamp oil for indoor use.

Warning

Keep this oil lamp out of reach of children 1–3 years old, both in use and when stored.

In case of small children, just a sip of lamp oil – or even sucking the wick – may lead to life-threatening lung damage.

If lamp oil is swallowed, do not induce vomiting. Seek medical advice immediately or contact a poison information centre and show these warnings.

If the oil lamp is over-filled, a minor oil leak may occur. If the lamp is placed on a fragile surface, we recommend to use a trivet.

1. All included parts. Lamp holder (a), funnel (b), wick (c), wick guard (d).

2. Place the funnel (b) on the lamp holder. With help of the funnel pour the lamp oil into the lamp holder (max 50 ml). Use a high quality lamp oil for indoor use. Insert the wick (c) into the hole and in the small track, push and rotate for safety check. Recommended functional height of the wick is 3 mm.

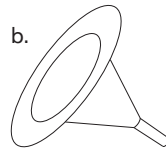

3. For safety reasons there is a wick guard (d) supplemented that shall be used as a protection in the presence of children. The wick guard shall be inserted between the wick and the lamp holder.

NOTE: The wick guard (d) can get hot, handle with care.
